

Pravesh Kumar Tiwari

Jabalpur, India | PH: +91 8319661649 | Pravesht252@gmail.com | Github: [Pravesh52](#) | LinkedIn: [pravesh-tiwari-6a262b30b](#)

PROFESSIONAL SUMMARY

Motivated Computer Science student with strong foundations in Data Structures & Algorithms, Machine Learning, and Full-Stack Development. Experienced in building AI-powered applications using Computer Vision and NLP techniques. Proficient in Python, C++, and the MERN Stack, with a passion for applying research-driven approaches to solve real-world problems.

WORK EXPERIENCE

Full-Stack Developer (Self-Initiated) | 2024 – Present

- Independently built and deployed 2 production-grade apps (LMS + ScanBite) covering full SDLC — from design to live deployment.
- Integrated Razorpay, Twilio, N8n, JWT auth, and REST APIs following industry-standard practices.
- Solved 250+ DSA problems (LeetCode/GFG) and explored ML/AI concepts through Python-based experimentation.

EDUCATION

GLOBAL ENGINEERING COLLEGE, RGPV UNIVERSITY

Jabalpur, India

Bachelor of Technology in Computer Science

Graduated: May 2027

Cumulative CGPA: 8.4/10;

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP, Software Engineering, Web Technologies, MERN Stack Development, Machine Learning, Computer Vision

UNIVERSITY PROJECTS

Learning Management System (LMS)

<https://github.com/Pravesh52/Learning-Management-Platforms>

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Stripe/Razorpay

Mar 2026

- Developed a scalable full-stack Learning Management System (LMS) using the MERN stack.
- Implemented JWT-based authentication with role-based access control (Student/Instructor/Admin).
- Built RESTful APIs for course management, enrollment, and progress tracking..
- Designed with focus on accessible education delivery — role-based access for Students, Instructors and Admins, enabling scalable online learning."
- Deployed the application on Render with features like dashboards and user analytics..

ScanBite — QR Based Restaurant Ordering System

<https://github.com/Pravesh52/ScanBite>

Tech Stack: React.js, Node.js, Express.js, Google Sheets, N8n, Razorpay, Twilio, Docker

Jun 2026

- Designed and implemented a QR-based restaurant ordering system processing real-time customer transactions, reducing order errors by eliminating manual waiter intervention.
- Engineered an automated workflow using N8n and Google Sheets as a lightweight backend, enabling real-time invoice generation and SMS notifications via Twilio — demonstrating low-cost systems design for resource-constrained environments. .
- Containerized the application using Docker for consistent deployment across environments.

ACTIVITIES

- Solved 250+ DSA problems on LeetCode/GeeksforGeeks covering arrays, graphs, dynamic programming, and greedy algorithms.
- Built and deployed 2 full-stack production applications (LMS and ScanBite) with live users, payment integration, and automated workflows — demonstrating end-to-end engineering ownership.
- Actively exploring AI/ML concepts including supervised learning, neural networks, and NLP through hands-on projects and coursework.

ADDITIONAL

Technical Skills: C, C++, Java, Python(Intermediate); Data Structures & Algorithms; OOPS; Web Development (HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB); SDLC & Agile; DBMS; REST APIs; Debugging; Git/GitHub. MySQL,

Additional Skills: Competitive Coding (Basics), Problem Solving, Team Collaboration, Analytical Thinking & Problem Solving

AI Tools: ChatGPT, Claude, Gemini, GitHub Copilot, Cursor, Perplexity AI, v0 by Vercel, Locofy, Notion AI, Grammarly AI.

Languages: English (Written & Spoken), Hindi (Written & Spoken)
